SPEAKER**

PRIME ELEVATION – THE WORLD’S MOST VERSATILE HOME THEATER SPEAKER

Prime Elevation sonically soars as an uncompromised height effects speaker, and as a front, center, LCR, surround and/or rear surround speaker when perfect placement is not possible or practical.

SVS TAKES OBJECT BASED SURROUND SOUND TO NEW HEIGHTS

Exciting new surround sound formats such as Dolby Atmos®, DTS:X® and Auro 3D®, known as “object based surround sound”, unleash the ultimate immersive home audio experience by incorporating sound effects emanating from overhead. Prime Elevation is an optimal height effects speaker because it directly radiates full-range sound to the listener without the frequency response limitations and perfect room conditions required of prevailing “ceiling bounce” height effects speaker designs.

AMAZINGLY ADAPTABLE. EASY TO INSTALL. SOLVES COUNTLESS SPEAKER PLACEMENT CHALLENGES.

The specially optimized angled front baffle, precisely tuned acoustics, high-end components and innovative Multi-Angle Wall Bracket (patent pending) combine to make Prime Elevation the world’s most versatile and easiest to install home theater speaker. Ingeniously engineered to address a multitude of room challenges, Prime Elevation is the perfect solution for imperfect room placement options.

- » Down-Firing Height Effects Speaker – Placed high on a side wall, the directly radiated sound is a vast improvement over compromised “ceiling bounce” solutions.
- » Up or Down-Firing Front, LCR and/or Center Channel Speaker - Placed above or below the viewing area, directed at listener, when placement of a true front, center or LCR at ear level isn’t possible.
- » Side or Rear-Firing Surround Speaker - Placed on side wall for rear effects or rear wall for side effects when optimal placement is not possible.

TECHNICAL SPECIFICATIONS

- » 1" aluminum dome tweeter features FEA-optimized diffuser
- » 4.5" polypropylene cone woofer with aluminum shorting rings
- » 1" wide flared rear-firing port
- » Acoustically transparent cloth grille with pin/cup retention system
- » Elastomer stick-on bumper feet
- » Multi-Angle Wall Bracket (patent pending) for easy mounting
- » Overall Dimensions: 9.25" (H) X 5.44" (W) X 8.98" (D) (includes grille and SVS Multi-Angle Wall Bracket)
- » Stunning Black Ash, Piano Gloss Black, Piano Gloss White finishes
- » Weight unboxed: 7.8 pounds each
